

Symbolism in „Indestructible Culture“– by Erik Kučera

This collage was created in representation of the survival of the Jewish People. Although throughout time many have tried to eradicate us from the face of the Earth (and unfortunately still try to do today), we have survived and will continue to do so. It is the struggle and survival of our culture and our people in the face of death, slavery, torture and attempted destruction. Our faith, our traditions and our people survive and will continue to do so.

On the above left side we see a Star of David which is cut in pieces but still showing the Star as a whole. This represents the Jewish people, who may be scattered around the Earth but still make up the Jewish people as a whole.

With strong colors and the symbol of wood, which is so strong, yet versatile to create fire, to build homes, to offer protection. We are a versatile and strong people, people who will keep our tradition and never give up.
